

Industrial Gold Reciprocating Compressors

8-14hp CA1U Elite Series

- A** Vibration isolation pads- saves wear and tear on the tank and make installation easier, reduces vibration & noise
- B** Automatic tank drain- the compressor tank is drained daily for you
- C** Easy to read tank pressure gauge
- D** Industrial Duty driven engine, options are Honda, Kohler, and Kohler Diesel
- E** Cast compressor inner cooler manifold-no flimsy copper pipe to break, allows for reliable day in day out compressor operation
- F** OSHA belt guard
- G** Compressed air belt guard after cooler-aids in moisture reduction, and cools compressor discharge air to within 20F or ambient
- H** Cast iron compressor discharge cooler manifold-allows for additional cooling and reliable day in day out compressor use
- I** Compressor built with disk and spring valves-allows for day in day out use, no flimsy reed valves to crack or break
- J** Compressor head unloaders- allows for pump valve cooling when in compression, also saves on fuel cost by reducing the load on the engine when air demand is low
- K** Cast iron compressor inner cooler manifold-no flimsy pipe to break, allows for reliable day in day out use
- L** Battery mounted and wired-allows for easier install, reduced installation costs, drive engine has a 3-8 amp recharging system
- M** Centrifugal unloader-allows for easier compressor head pressure release, saves fuel and wear and tear on the drive engine
- N** Compressor fork lift slots-allows for easier moving around and installation of the compressor package
- O** ASME/CRN 200PSI working pressure rated air receiver

No start up kits needed for operation (Units ship factory filled)
